- User story:

```
As a user, I want to be able to see my profile summary, so I know
how much time I am spending on different kind of work
As a user, I want to be able to see the details of the summary, so
I can plan better
As a user, I want to be able to use the userid given to me to view
my profile, so I can trust it is my profile
As a user, I want to be able to use the password given to me to
view my profile, so I can trust it is my profile
As a user, I want to be able to log change requests for my profile
when I discover an anomaly.

As an admin, I want to be able to change the figures being tracked
(review), when a user requests it.
As an admin, I want to see all requests logged by different users,
so I can review appropriately.
As an admin, I want to be able to log in with my password and
username, for security purposes.

Future work:
implement socket
As a user, I want to be able to rate my experience on the site
As an admin, I want to be able to see the user ratings, so I can
see if I am doing well
As a user, I want to be able to see that change request have being
treated when I log in again
As an admin, I need to be able to send a notification that a
change request has been handled.
```

- Compress all your project files into a single ZIP file, including the Flask app files and the deployment configuration files.
  Done
- Submit the ZIP file along with clear instructions on how to deploy and access the web app on Render.com.
  Instructions
    - Click on this link to access the submission or copy and paste on browser
      https://ucd-submission-3-octopus.onrender.com
    - You can log in as two different users and an admin but log in as any user first.

	Username	Passcode
User1	moh12	1234
User2	zoh13	1234
Admin	admin	admin

- After logging in you see an abridged version of the user profile. Click view dashboard to see a more detailed view
- On the dashboard:
    - You can navigate to view the daily, weekly and monthly work hours of a user by clicking on the daily, weekly and monthly buttons
    - You can request review of the page by clicking on the request review button and this will be take you to the request page
    - You can log out by clicking the logout button
- On the request page you can make request by worktype and this will be sent to the admin
- Log in as an admin now to view the requests submitted then change any of the entries and click save all changes.
- Go back to the user tab then click the view dashboard button on the request page. The changes you made as an admin should reflect on the user page.

● Ensure that your code is properly structured and follows best practices.
  Done
● Implement additional features or design enhancements to showcase your creativity and skills.
  Done
● Include comments in your code to explain complex logic or functionality.
  Done
● Make sure your Flask app is compatible with Render's requirements and configurations.
  Done
● Ensure that your web app is accessible and functional on the provided Render URL.
  Done
● Double-check the deployment instructions and any necessary configuration details to ensure a smooth deployment process.
  Done
● Include any additional details or considerations specific to the deployment on Render.com in your submission.
  Done
● Verify the hosted web app's functionality and appearance after deployment to ensure it matches your local development version.
